SUMMARY

Detail-oriented professional with hands-on experience in Python, SQL, Power BI, and Machine Learning fundamentals. Skilled in data preprocessing, exploratory data analysis, and developing predictive models using Scikit-learn. Passionate about Artificial Intelligence, Deep Learning, and leveraging data to generate actionable insights and solve real-world challenges.

EDUCATION

B.Tech – Information Technology | K.S.Rangasamy College of Technology

Graduating May 2026

CGPA: 7.75

SKILLS

Programming Languages: Python, SQL

BI & Visualisation: Power BI, Tableau

Database: PostgreSQL

Tools & Platforms: Jupyter Notebook, Google Colab

EXPERIENCE

TECH VEDHU – Data Analyst Intern

Sep 2025 – Oct 2025

- ✓ Analysed customer data of 3,000+ records using Python and SQL to identify purchasing patterns and segment customers.
- ✓ Built interactive dashboards in Power BI and Excel, improving decision-making efficiency by 20%.
- ✓ Generated actionable insights that helped identify high-value customer segments and sales trends.

EDUNET FOUNDATION – AICTE | AI & Data Analyst Intern (Remote)

Dec 2024 – Jan 2025

- ✓ Developed a Power BI dashboard to analyse energy consumption data (1,000+ records) and track sustainability metrics.
- ✓ Performed data visualisation and trend analysis, identifying a 15% increase in energy usage patterns.
- ✓ Delivered insights to support green analytics and data-driven decision-making.

PROJECTS

DDoS Attack Detection and Prevention Using Machine Learning

Technologies: Python, Flask, React.js, SQLite, Scikit-learn

- ✓ Developed a machine learning model to detect DDoS attacks by analyzing network traffic data and identifying malicious patterns.
- ✓ Built a Flask backend and React-based desktop application for real-time attack monitoring and prediction.
- ✓ Integrated SQLite database to store traffic logs and detection results, enabling efficient threat analysis and prevention.

Customer Behaviour Analysis | Python · PostgreSQL · Power BI

Technologies: Python, PostgreSQL, Power BI, Excel

- ✓ Used Python (Pandas) for data cleaning and preprocessing of 5,000+ customer records, resolving missing values and outliers.
- ✓ Queried PostgreSQL to identify key purchasing trends, churn patterns, and high-value customer segments from transactional data.
- ✓ Built an interactive Power BI dashboard to visualise KPIs such as retention rate, lifetime value, and sales trends for stakeholder reporting.

CERTIFICATIONS

Oracle Analytics Cloud 2025 Certified Professional – Oracle Oct 2025

Microsoft Power BI – Infosys Springboard Jul 2025

Data Analytics Masterclass – NoviTech R&D; Pvt. Ltd. Jan 2025

Excel, MySQL, Python, Power BI, ChatGPT: A-Z Data Analysis – Udemy Apr 2025

GenAI-Powered Data Analytics Job Simulation – Tata – Forage May 2025

CO-CURRICULAR & EXTRA-CURRICULAR

Research Paper Presentation – Karpagam Engineering College

Mar 2024

Presented a research paper on integrating Artificial Intelligence to enhance cybersecurity.

Dark Patterns Hackathon – Ethical UX Design

Jan 2024

Participated in a hackathon focused on ethical e-commerce design, addressing deceptive user experience practices.
